List of publications of Zbigniew Ciesielski:

Articles

1. *On some inequalities*, Prace Mat. **2** (1958), 361–367 (Polish).

2. *A note on some inequalities of Jensen's type*, Ann. Polon. Math. **4** (1958), 269–274.

3. *On absolute convergence of Fourier series of almost all functions of Wiener space*, Bull. Acad. Polon. Sci. Sr. Sci. Math. Astr. Phys. **6** (1958), 501–503.

4. (with Orlicz, W.), *Some remarks on the convergence of functionals on bases*, Studia Math. **16** (1958), 335–352.

5. *O rozwinięciach ortogonalnych prawie wszystkich funkcji z przestrzeni Wienera.* Rozprawa Doktorska, Poznań 1959, Uniwersytet im. Adama Mickiewicza, promotor Władysław Orlicz (Polish). Ph.D Thesis *On orthogonal expansions of almost all functions from the Wiener space* at the Adam Mickiewicz Uniwersyity, Poznań 1959, advisor Władysław Orlicz.

6. *On Haar functions and on the Schauder basis of the space* $C_{<0,1>}$, Bull. Acad. Polon. Sci. Sr. Sci. Math. Astronom. Phys. **7** (1959), 227–232.

7. (with Musielak, J.) *On absolute convergence of Haar series*, Colloq. Math. **7** (1959), 61–65.

8. *Some properties of convex functions of higher orders*, Ann. Polon. Math. **7** (1959), 1–7.

9. *On multiplicative sequences*, Colloq. Math. **7** (1959/1960), 265–268.

10. *Some properties of Schauder basis of the space* $C_{<0,1>}$, Bull. Acad. Polon. Sci. Sr. Sci. Math. Astronom. Phys. **8** (1960), 141–144.

11. *On the isomorphisms of the spaces* H_α *and* m, Bull. Acad. Polon. Sci. Sr. Sci. Math. Astronom. Phys. **8** (1960), 217–222.

12. *Hölder conditions for realizations of Gaussian processes*, Trans. AMS **99** (1961), 403–413.

13. *On the functional equation* $f(t) = g(t) - g(2t)$, Proc. AMS **13** (1962), 388–393.

14. (with Taylor, S. J.) *First passage times and sojourn times for Brownian motion in space and the exact Hausdorff measure of the sample path*, Trans. AMS **103** (1962), 434–450.

15. (with Kesten, H.) *A limit theorem for the fractional parts of the sequence* $\{2^k t\}$, Proc. AMS **13** (1962), 596–600.

16. *Properties of the orthonormal Franklin system*, Studia Math. **23** (1963), 141-157.

17. (with Semadeni, Z.) *A survey of some newer methods in potential theory.* I: Generalized solutions of the Dirichlet problem, potentials and capacities. (Polish) Prace Mat. **8** (1963/1964), 147–191.

18. *On the orthonormal Franklin system.* Bull. Acad. Polon. Sci. Sr. Sci. Math. Astronom. Phys. **12** (1964), 461–464.

19. *Brownian motion, capacitory potentials and semi-classical sets.* I. Bull. Acad. Polon. Sci. Sr. Sci. Math. Astronom. Phys. **12** (1964), 265–270.

20. *Brownian motion, capacitory potentials and semi-classical sets.* II. Bull. Acad. Polon. Sci. Sr. Sci. Math. Astronom. Phys. **13** (1965), 147–150.

21. *Brownian motion, capacitory potentials and semi-classical sets.* III. Bull. Acad. Polon. Sci. Sr. Sci. Math. Astronom. Phys. **13** (1965), 215–219.

22. (with Semadeni, Z.) *Survey of some newer methods in potential theory.* II: Generalized notions of a boundary. (Polish) Prace Mat.. **9** (1965), 149–168.

23. *Gaussian processes*, Prace Mat.. **9** (1965), 137–143.

24. *Heat conduction and the principle of not feeling the boundary*, Bull. Acad. Polon. Sci. Sr. Sci. Math. Astronom. Phys. **14** (1966), 435–440.

25. *Fourier analysis of the Banach indicatrix*, Colloq. Math. **15** (1966), 99–103.

26. *Properties of the orthonormal Franklin system.* II. Studia Math. **27** (1966), 289–323.

27. *Lectures on Brownian Motion, Heat Conduction and Potential Theory.* Aarhus Universitet, Matematisk Institut 1966.

28. *Semiclassical potential theory.* 1967 Markov Processes and Potential Theory (Proc. Sympos. Math. Res. Center, Madison, Wis., 1967) pp. 33–59 Wiley, New York.

29. (with Semadeni, Z.) *A survey of some newer methods in potential theory*, III: Probabilistic methods in potential theory. (Polish) Prace Mat. **11** (1967), 99–128.

30. *A bounded orthonormal system of polygonals.* Studia Math. **31** (1968), 339–346.

31. (with Kac, M.) *Some analytic aspects of probabilistic potential theory.* Zastos. Mat. **10** (1969), 75–83.

32. *Approximation by spline functions and an orthonormal basis in $C^{(1)}(I^2)$.* Proceedings of the Conference on the Constructive Theory of Functions (Approximation Theory) (Budapest, 1969), pp. 85–88. Akadmiai Kiadó, Budapest, 1972.

33. *A construction of basis in $C^{(1)}(I^2)$.* Studia Math. **33** (1969), 243–247.

34. *Construction of an orthonormal basis in $C^m(I^d)$.* Constructive theory of functions (Proc. Internat. Conf., Varna, 1970) (Russian), pp. 147–150. Izdat. Bolgar. Akad. Nauk, Sofia, 1972.

35. *On the spectrum of the Laplace operator.* Comment. Math. Prace Mat. **14** (1970), 41–50.

36. *Entropy in mathematics and physics.* (Polish) Wiadom. Mat. **(2) 12**, no. 2, (1971), 233–255. Translated into Bulgarian: Fiz.-Mat. Spis. Bulgar. Akad. Nauk. **16(49)** (1973), 205–225.

37. (with Domsta, J.) *On two representations of spline functions,* Zeszyty Naukowe Wydzialu Matematyki, Fiz. i Chem., Uniwersytet Gdański, Matematyka nr **1** (1971), 27–37 (Polish).

38. *On differentiable Gaussian processes.* Transactions of the Sixth Prague Conference on Information Theory, Statistical Decision Functions, Random Processes (Technical Univ., Prague, 1971; dedicated to the memory of Antonn Špaček), pp. 143–148. Academia, Prague, 1973.

39. (with Domsta, J.) *Construction of an orthonormal basis in $C^m(I^d)$ and $W_p^m(I^d)$.* Studia Math. **41** (1972), 211–224.

40. (with Domsta, J.) *Estimates for the spline orthonormal functions and for their derivatives.* Collection of articles honoring the completion by Antoni Zygmund of 50 years of scientific activity, IV. Studia Math. **44** (1972), 315–320.

41. *Spline bases in function spaces.* Approximation theory (Proc. Conf., Inst. Math., Adam Mickiewicz Univ., Poznań, 1972), pp. 49–54. Reidel, Dordrecht, 1975.

42. *Brownian motion with a several-dimensional time.* Bull. Acad. Polon. Sci. Sr. Sci. Math. Astronom. Phys. **21** (1973), 629–635.

43. *Bases and approximation by splines.* Proceedings of the International Congress of Mathematicians (Vancouver, B. C., 1974), Vol. **2**, pp. 47–51. Canad. Math. Congress, Montreal, Que., 1975.

44. *White noise and Lvy's Brownian motion with a several-dimensional time.* Proceedings of the Symposium to honour Jerzy Neyman (Warsaw, 1974), pp. 57–69. Państw. Wydawn. Nauk., Warsaw, 1977.

45. *Stochastic systems of particles.* Probability–winter school (Proc. Fourth Winter School, Karpacz, 1975), pp. 1–28. Lecture Notes in Math., Vol. **472**, Springer, Berlin, 1975.

46. *On Lévy's Brownian Motion with a Several–Dimensional time.* Probability–winter school (Proc. Fourth Winter School, Karpacz, 1975), pp. 29–56. Lecture Notes in Math., Vol. **472**, Springer, Berlin, 1975.

47. *Constructive function theory and spline systems.* Studia Math. **53** (1975), 277–302.

48. *Stochastic equation for realization of the Lévy Brownian motion with a several-dimensional time.* Bull. Acad. Polon. Sci. Sr. Sci. Math. Astronom. Phys. **23** (1975), 1193–1198.

49. *The $C(I)$ norms of orthogonal projections onto subspaces of polygonals.* Theory of functions and its applications (collection of articles dedicated to Sergei Mihailovich Nikolskii on the occasion of his seventieth birthday). Trudy Mat. Inst. Steklov. **134** (1975), 366–369.

50. (with Niedźwiecka, E.) *Rozmowa z maszyną cyfrową Odrą 1204 o aproksymacji funkcjami łamanymi.* Wiadomości Mat. **20** (1976), 29–34 (Polish).

51. *Approximation by splines and its application to Lipschitz classes and to stochastic processes.* The theory of the approximation of functions (Proc. Internat. Conf., Kaluga, 1975) (Russian), pp. 397–404, "Nauka", Moscow, 1977.

52. (and Simon, Peter; Sjölin, P.) *Equivalence of Haar and Franklin bases in L_p spaces.* Studia Math. **60** (1977), 195–210.

53. *Equivalence, unconditionality and convergence a.e. of the spline bases in L_p spaces.* Approximation Theory (Papers presented at the VI–th Semester, Stefan Banach Internat. Math. Center, Warsaw, 1975), pp. 55–68, Banach Center Publ., **4**, PWN, Warsaw, 1979.

54. (with Zabczyk, J.) *A note on a selection problem.* Probability theory (Papers, VIIth Semester, Stefan Banach Math. Center, Warsaw, 1976), pp. 47–51, Banach Center Publ., **5**, PWN, Warsaw, 1979.

55. *Probabilistic and analytic formulas for the periodic splines interpolating with multiple nodes.* Probability theory (Papers, VIIth Semester, Stefan Banach Internat. Math. Center, Warsaw, 1976), pp. 35–45, Banach Center Publ., **5**, PWN, Warsaw, 1979.

56. *Gaussian distribution and its appearance in various problems.* Festakt und Tagung aus Anlass des 200. Geburtstages von Carl Friedrich Gauss (Berlin, 1977), pp. 93–97, Abh. Akad. Wiss. DDR, Abt. Math. Naturwiss. Tech., 1978, **3**, Akademie-Verlag, Berlin, 1978.

57. *Convergence of spline expansions.* Linear spaces and approximation (Proc. Conf., Math. Res. Inst., Oberwolfach, 1977), pp. 433–448, Lecture Notes in Biomath., **21**, Springer, Berlin-New York, 1978.

58. *Equivalence and Shift Property of Spline Bases in L_p Spaces.* Proc. Conf. on Constructive Function Theory, Blagoevgrad 1977, pp. 281–291. Publ. House of the Bulg. Ac. of Sci., Sofia 1980.

59. *Properties of realizations of random fields.* Mathematical statistics and probability theory (Proc. Sixth Internat. Conf., Wisła, 1978), pp. 97–110, Lecture Notes in Statist. **2**, Springer, New York-Berlin, 1980.

60. (with Kwapień, S.) *Some properties of the Haar, Walsh-Paley, Franklin and the bounded polygonal orthonormal bases in L_p spaces.* Special issue dedicated to Władysław Orlicz on the occasion of his seventy-fifth birthday. Comment. Math. Special Issue **2** (1979), 37–42.

61. (with Figiel, T.) *Construction of Schauder bases in function spaces on smooth compact manifolds.* Approximation and function spaces (Gdańsk, 1979), pp. 217–232, North-Holland, Amsterdam-New York, 1981.

62. *The Franklin orthogonal system as unconditional basis in $\operatorname{Re} H^1$ and VMO.* Functional analysis and approximation (Oberwolfach, 1980), pp. 117–125, Internat. Ser. Numer. Math., 60, Birkhuser, Basel-Boston, Mass., 1981.

63. *Bases and K-functionals for Sobolev spaces over C^∞ compact manifolds.* Recent trends in mathematics, Reinhardsbrunn 1982, pp. 47–55, Teubner-Texte zur Math., **50**, Teubner, Leipzig, 1982. See also: Trudy Steklova **164** (1983), 197–202.

64. *Spline bases in spaces of analytic functions.* Second Edmonton conference on approximation theory (Edmonton, Alta., 1982), 81–111, CMS Conf. Proc., **3**, Amer. Math. Soc., Providence, RI, 1983.

65. (with Figiel, T.) *Spline approximation and Besov spaces on compact manifolds.* Studia Math. **75** (1982), 13–36.

66. (with Figiel, T.) *Spline bases in classical function spaces on compact C^∞ manifolds.* I. Studia Math. **76** (1983), 1–58.

67. (with Figiel, T.) *Spline bases in classical function spaces on compact C^∞ manifolds.* II. Studia Math. **76** (1983), 95–136.

68. (with Chang, Sun-Yung A.) *Spline characterizations of H^1.* Studia Math. **75** (1983), 183–192.

69. *Spline bases in classical function spaces on C^∞ compact manifolds*, part III in Constructive Theory of Functions 84, Proceedings of the International Conference on Constructive Theory of Functions, Varna, May 27 - June 2, 1984, pp. 214-223. Publishing House of the Bulgarian Academy of Sciences, Sofia 1984.

70. (with Domsta, J.), *The degenerate B-splines as basis in the space of algebraic polynomials*, Ann. Polon. Math. **46** (1985), 71-79.

71. *Approximation by polynomials and extension of Parseval's identity for Legendre polynomials to the L^p case*, Acta Scientiarum Mathematicarum **48** (1985), 65-70.

72. *Approximation by algebraic polynomials on simplices*, Uspekhi. Matem. Nauk **40** (1985), pp. 212-214. (in Russion)

73. *Biorthogonal system of polynomials on the standard simplex.* Multivariate Approximation Theory III. Proceedings of the Oberwolfach Conference, January 20-26, 1985, pp. 116-119. International Series of Numerical Mathemathics 75 (1985), Birkhäuser Verlag Basel.

74. *Approximation by algebraic polynomials on simplices*, Uspekhi. Matem. Nauk **40** (1985), 212-214. See also the Russion translation by K. I. Oskolkov.

75. *Haar orthogonal functions in analysis and probability* Proceedings of the Alfred Haar Memorial Conference, Budapest, August 11-17, 1985, pp. 25-56. Colloquia Mathematica Societatis János Bolyai **49** (1987), Budapest.

76. *Multiple Satble Stochastic Integrals.* Probability and Mathematical Statistics. Proceedings of the Fourth Vilnius Conference, Vilnius, USSR, June 24-29, 1985, pp. 363-374. Edited by Yu. V. Prohorov, V. A. Statulevicius, V. V. Sazonov and B. Grigelionis. VNU SCIENCEPRESS Utrecht, The Netherlands 1987.

77. *On the B-spline Basis in the Space of Algebraic Polynomials*, Ukr. Mat. J. **38** (1986), 359-364. Mat.

78. *Bases in Function Spaces.* Approximation Theory V. Proceedings of the Fifth International Symposium , College Station, Texas, January 13-17, 1986, pp. 31-54. Edited by C. Chui. Academic Press 1986.

79. *Explicit Formula Relating the Jacobi, Hahn and Bernstein Polynomials,* SIAM J. MATH. ANAL. **18**.6 November 1987, pp. 1573-1575.

80. *Nonparametric polynomial density estimation in the L^p norm.* Approximation and optimization (Havana, 1987), 1–10, Lecture Notes in Math., **1354**, Springer, Berlin, 1988.

81. *Local spline approximation and nonparametric density estimation.* Constructive theory of functions (Varna, 1987), 79–84, Publ. House Bulgar. Acad. Sci., Sofia, 1988.

82. *Nonparametric polynomial density estimation,* Probab. Math. Statist. **9**.1 (1988), 1–10.

83. *Haar system and nonparametric density estimation in several variables,* Probab. Math. Statist. **9**.2 (1988), 1–11.

84. *Asymptotic nonparametric spline density estimation in the Sobolev norm in several variables.* Stochastic methods in experimental sciences (Szklarska Poreba, 1989), 59–78, World Sci. Publishing, River Edge, NJ, 1990.

85. *Asymptotic nonparametric spline density estimation in several variables.* Multivariate approximation and interpolation (Duisburg, 1989), 25–53, Internat. Ser. Numer. Math., 94, Birkhuser, Basel, 1990.

86. *An algorithm for best approximating algebraic polynomials in L^p over a simplex.* Multivariate approximation theory, IV (Oberwolfach, 1989), 95–102, Internat. Ser. Numer. Math., 90, Birkhuser, Basel, 1989.

87. *Numerical integration with weights of convex functions of algebraic polynomials.* Colloq. Math. **60/61** (1990),671–679.

88. *Numerical weighted integration of convex functions of algebraic polynomials over cubes.* Approximation interpolation and summability (Ramat Aviv, 1990/Ramat Gan, 1990), 121–127, Israel Math. Conf. Proc., 4, Bar-Ilan Univ., Ramat Gan, 1991.

89. *Modulus of Smoothness of the Brownian Paths in the L^p Norm.* Proceedings: CONSTRUCTIVE THEORY OF FUNCTIONS, Varna '91, 71–75. Sofia 1992.

90. *On the A. A. Markov inequality for polynomials in the L^p case.* Approximation theory (Memphis, TN, 1991), 257–262, Lecture Notes in Pure and Appl. Math., 138, Dekker, New York, 1992.

91. *Asymptotic nonparametric spline density estimation.* Probab. Math. Statist. **12** (1991), 1–24.

92. *Fractal functions and Schauder bases.* Panoramas of mathematics (Warsaw, 1992/1994), 47–54, Banach Center Publ., 34, Polish Acad. Sci., Warsaw, 1995. See also: Concrete analysis. Comput. Math. Appl. **30** (1995), 283–291.

93. (with Kerkyacharian, G.; Roynette, B.) *Quelques espaces fonctionnels associs a des processus gaussiens.* (French) [Some function spaces associated with Gaussian processes] Studia Math. **107** (1993), 171–204.

94. *Orlicz spaces, spline systems, and Brownian motion.* Constr. Approx. **9** (1993), 191–208.

95. (with Kamont, A.) *On the fractional Levy's random field on the sphere.* East J. Approx. **1** (1995), 111–123.

96. (with Kamont, A.) *Lvy's fractional Brownian random field and function spaces.* Acta Sci. Math. (Szeged) **60** (1995), 99–118.

97. *Spline orthogonal systems and fractal functions.* Acta Math. Hungar. **68** (1995), 287–293.

98. *O twierdzeniach rodem z Pohania.* Poznańska Szkoła Matematyczna, pp. 41–51. Poznań 1995 (Polish).

99. *Local box dimension of fractal functions.* Multivariate approximation (Witten-Bommerholz, 1996), 27–33, Math. Res., 101, Akademie Verlag, Berlin, 1997.

100. *Wybrane aspekty matematycznej teorii ruchu Browna.* List naukowy złożony na ręce Prezydenta Miasta Gdańska. Uczeni Gdańska — Laureaci Nagrody im. Jana Heweliusza, pp. 225–241. Gdańskie Towarzystwo Naukowe, Gdańsk 1997.

101. (with Kamont, Anna) *Projections onto piecewise linear functions.* Dedicated to Roman Taberski on the occasion of his 70th birthday. Funct. Approx. Comment. Math. **25** (1997), 129–143.

102. *Nonparametric density estimation by polynomials and by splines.* Approximation theory, 157–166, Monogr. Textbooks Pure Appl. Math., 212, Dekker, New York, 1998.

103. *Orthogonal projections onto spline spaces with arbitrary knots.* **Function spaces** (Poznań, 1998), 133–140, Lecture Notes in Pure and Appl. Math., 213, Dekker, New York, 2000.

104. *Mark Kac (1914–1984) — wspomnienia*, pp. 185–192. Matematycy Polskiego Pochodzenia na Obczyźnie. Uniwersytet Szczeciński 1998 (Polish).

105. (with Kamont, Anna) *On the choice of the spline density estimators.* Math. Pannon. **10** (1999), 17–28.

106. *Bases in Function Spaces on Compact Sets.* Curve and Surface Fitting (Saint–Malo 1999), 121–134. Albert Cohen, Christophe Rabut and Larry L. Schumaker (eds.)

107. (with Gevorkyan, Gegham) *Franklin spline orthogonal system in $L^p(R)$ with $0 < p \leqslant 1$.* Acta Sci. Math. (Szeged) **66** (2000), 211–226.

108. (with Ciesielski, Boleslaw) *Image compression with Schauder bases.* Appl. Math. (Warsaw) **28** (2001), 367–390.

109. *A look at bases in function spaces at the beginning of the XXI century.* Trends in approximation theory (Nashville, TN, 2000), 53–72, Innov. Appl. Math., Vanderbilt Univ. Press, Nashville, TN, 2001.

110. (with Kamont, Anna) *Survey on the orthogonal Franklin system.* Approximation theory, 84–132, DARBA, Sofia, 2002.

111. (with Kamont, Anna) *The Lebesgue constants for the Franklin orthogonal system.* Studia Math. **164** (2004), 55–73.

112. (with Beśka, M.) *Ergodic Type Theorems for Gaussian Systems.* Proceedings of the Steklov Institute of Mathematics, Vol. **248** (2005), pp. 38–43.

113. (with Beśka, M.) *Gebelein's inequalities and its consquences.* Banach Center Publications vol. **72**, 11–23. Warszawa 2006.

114. (with Beśka, M.) *On Sequences of the White Noises.* Probab. Math. Statist. **26** (2006), 201–209.

115. (with Zieliński, R.) *Polynomial and Spline Estimators of the Didtribution Function with Prescribed Accuracy.* Appl. Math. (Warsaw) **36** (2009), 1–12.

Editorial works

116. *Approximation theory.* Proceedings of the Conference held at the Institute of Mathematics of the Adam Mickiewicz University, Poznań, 22–26 August, 1972. Edited by Zbigniew Ciesielski and Julian Musielak. D. Reidel Publishing Co., Dordrecht-Boston, Mass.; PWN-Polish Scientific Publishers, Warsaw, 1975. xii+289 pp.

117. *Probability—Winter School.* Proceedings of the Fourth Winter School on Probability held at Karpacz, January 1975. Edited by Z. Ciesielski, K. Urbanik, and W. A. Woyczyński. Lecture Notes in Mathematics, Vol. 472. Springer-Verlag, Berlin-New York, 1975. vi+283 pp.

118. *Approximation theory.* Papers presented at the VIth semester at the Stefan Banach International Mathematical Center, Warsaw, September 17–December 17, 1975. Edited by Zbigniew Ciesielski. Banach Center Publications, **4**. PWN—Polish Scientific Publishers, Warsaw, 1979. 316 pp.

119. *Probability theory.* Papers presented at the VIIth Semester at the Stefan Banach International Mathematical Center, Warsaw, February 11–June 11, 1976. Edited by Zbigniew Ciesielski. Banach Center Publications, **5**. PWN—Polish Scientific Publishers, Warsaw, 1979. 289 pp.

120. *Approximation and function spaces.* Proceedings of the International Conference held in Gdańsk, August 27–31, 1979. Edited by Zbigniew Ciesielski. North-Holland Publishing Co., Amsterdam-New York; PWN—Polish Scientific Publishers, Warsaw, 1981. xiv+897 pp.

121. *Proceedings of the international congress of mathematicians.* Vol. 1, 2. Held in Warsaw, August 16–24, 1983. Edited by Zbigniew Ciesielski and Czesław Olech. PWN—Polish Scientific Publishers, Warsaw; North-Holland Publishing Co., Amsterdam, 1984. lxii+1730 pp. ISBN: 83-01-05523-5 00A11

122. *Approximation and function spaces.* Papers from the Twenty-seventh Semester held in Warsaw, February 27–May 27, 1986. Edited by Zbigniew Ciesielski. Banach Center Publications, **22**. PWN—Polish Scientific Publishers, Warsaw, 1989. 486 pp.

123. *Orlicz Centenary Volume.* Edited by Zbigniew Ciesielski, Aleksander Pełczyński and Leszek Skrzypczak. Banach Center Publications vol. **64**. Warszawa 2004.
